STATE OF ALASKA  
REGULATORY COMMISSION OF ALASKA

**GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.**

**RATE SCHEDULE T-5**

**Operating Reserve - Spinning Reserve Service**

Spinning Reserve Service is needed to serve load immediately in the event of a system contingency. Spinning Reserve Service may be provided by generating units that are on-line and loaded at less than maximum output. The Transmission Provider must offer this service when the transmission service is used to serve load within its Transmission Provider's Service Territory Area. The Transmission Customer must either purchase this service from the Transmission Provider or make alternative comparable arrangements to satisfy its Spinning Reserve Service obligation. The amount of and charges for Spinning Reserve Service are set forth below.

1. Spinning Reserve Requirements:

A Transmission Customer that obtains its Spinning Reserve Requirements through purchase of such service from the Transmission Provider shall be obligated to obtain an amount of reserved capacity (in kilowatts) each month equal to the ratio of the Transmission Customer's reserved capacity to the sum of the capacity of the Transmission Provider's largest generating unit operating, plus the Reserved Capacity of all Transmission Customers receiving Service, multiplied by Transmission Provider's spinning reserve requirements. To the extent that the Transmission Provider determines that a Transmission Customer's specific spinning reserve requirements are greater than the Spinning Reserve Requirements as provided above, the Transmission Provider has the right to require such Transmission Customer to purchase a greater amount of Spinning Reserve Requirements. To the extent that the Transmission Customer determines that its specific spinning reserve requirements are less than the Spinning Reserve Requirements as provided above, the Transmission Customer has the right to permit the Transmission Customer to purchase a lesser amount of Spinning Reserve Requirements.

**GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.**

**RATE SCHEDULE T-5 (CONT.)**

**Operating Reserve – Spinning Reserve Service (cont.)**

2. Compensation for Spinning Reserves:

\$1.1794 per month of Reserved Capacity in kW, or \$14.1534 per kW-year of Reserved Capacity in kW. R,R

Energy provided by the Transmission Provider associated with this service will be returned in like time hours, at the earliest practicable time. When a Transmission Customer purchases more or less than its Reserved Capacity for Spinning Reserve Service from the Transmission Provider, the rates shown above shall be adjusted for such variations.

3. Duration of Spinning Reserve Service:

A Transmission Customer that obtains its Spinning Reserve Requirements through purchase of such service from the Transmission Provider shall continue to receive the service for the first sixty (60) minutes immediately following system contingency. The Transmission Customer shall adjust and submit revised interchange schedules for the first sixty (60) minutes immediately following such system contingency, to reflect any constraints imposed by the contingency. If the Transmission Customer continues to receive power from the Transmission Provider after the first sixty (60) minutes of such system contingency, then power will be provided pursuant to a Transmission Provider rate schedule on file with the Commission. The Transmission Provider will accommodate the Transmission Customer's replacement energy schedules when technically feasible.
